The wheat crop in India for 1884 is \$245,000,000 bushels, raised on 26,000,000 acres of a land—or nine and two-fiths bushels to the acre. The United States average last year was thirteen bushels. The Delhi price is eighty cents per bushel. Cost of price is eighty cents per bushel. Cost of transportation from Delhi to Calcutta, transportation from Delhi to Calcutta, nineteen and one-half cents. where he ought to stand—a free, untrammeled statesman.

Speaking of Mr. Stanford's record, the writer says: "He was chosen [Governor] because of his acknowledged ability, his patriotic devotion to the principles upon which is based the inseparable Union of independent States, and for his far-sightedness, his indomitable perseverance and unfinching which I have traversed has been marked which I have traversed has been marked courage. He came to that high trust at the demand of his party in the days of the results are embodied in final form in the advance sheets to folits pristine purity, and as one of the men who aided in laying its foundations, broad and deep, upon the eternal principles of human rights and human hopes, that have made it the party of progressive intelligence and the bulwark each will find in this report, when finof human freedom. the commonwealth, whose swaddling clothes he helped to mature, a grant in its strength, and one of the fairest sisters in the galaxy of States. He has lived to see the party of his young manhood's choice become a mighty factor in eivilization and a political colossus in government."

Touching upon the sensitive feature of this choice, to wit: the relations of Mr. Stanford to the corporation which has aroused against itself so much an tagonism, the Record-Union gives expression to an idea akin to one that has already found utterance in these columns: "There will be those so short-sighted as to estimate the selection of Governor Stanford as a railroad triumph. Nothing can be further from the truth. On the contrary, it is to be the first state of the first state of the failth and the first state of the truth. On the contrary, it is to be the first state of the state of the first state of the failth and the first state of the truth. On the contrary, it is to be the first state of the first state of the failth and the first state of the first stat the truth. On the contrary, it is to be interpreted, if at all in the light of local issues, as a nearer approach to that harmony between producing and transportation interests essential to the very existence of each." We hope and believe that the above is not a strained view of the case. The Times is quite willing, in common with all fair-minded men, to give the future Senator a fair and patient trial before condemning him as one unduly biased by his corporate relations. If he disappoints the just expectations of the people of the State, they will not hositate to put the seal of their condemnation upon him. the truth. On the contrary, it is to be

Considering everything surrounding his case, Gov. Stanford will go into the Senate under circumstances far less un avorable and embarrassing than might be expected. Certainly nobody else among all the railroad magnates of Cal ifornia could "get there" with the feel ing against the corporation which exists even now, modified though it is

All persons in search of desirable locations for homes at reasonable prices, and who desire to locate in a good neighborhood where the improvements so far are first-class, will find it to their interest to thorughly examine the residence property on the west side of Stot street, between Aliso avenue and Brooklin street, known, as the "Breed tract." The Boyle Heights line of street cars run by the tract-every half hour. Carriages will not be in waiting to convey parties over the tract: neither will there be a free lunch spread for them but the streets will be found dry, the atmosphere pure, and the view from the hill such as ought to repay anyone for their trouble, whether they purchase a lot or not. The dwner of these lots proposes to sell them on their merits alone. He ce, no chromes will be presented to purchasers. THIS MEANS (1) OXYGEN, THE VITAL

I element of the air, without which no life
can exist for a moment; (2) Nitrogen, the conservative and preservative element; (3) Marnotism, with which the O and the N are scientifically combined and intensified. And this
gives us a curative age: t without an equal,
that contains three life-giving and health
preserving elements of nature's own selection
and of universal application. A poet has
named it, "Nature's Triple Elixir of Life,"
and a doctor has styled it, "Nature's Own
Bemedy for Many Diseases." It differs from
medicines, (1) In that it is not a medicine in
any sense, any more than the air we breathe
or the electric fluid; (2) It differs from medicine in that, being inhaled into the lungs, it
is absorbed directly by the blood and curse
by a natural process of revitalization and
cleaning; (3) It differs from medicine in that
its aphere of action is universal, thus adapting it, as the reader will see, to most diseases
of the human body; (4) It differs from all
medicines or other remedies in that it has
cured 75 persons out of every 100 who have
taken it. It cannot cure, of course, where
there is nothing to build upon. As thousands
do have testified, it cures Asthma, Bron hitis,
Catarrh, Consumption, Nervous Exhaustion,
Paralysis, and other nervous and wasting diseases, not to mention-Scorolus. Dyspepsia,
Neuralpia, Eheumatism, Female Diseases,
It affords us pleasure, therefore, to say to

upon prescription or application.

ONDAY AND TUESDAY EVENINGS, JAN THE PANEL GAME. Inita Sanchez Discounted by Min nie Brown. Minnie Brown, a loose character 360 New High street, seems desirous of outdoing Anita Sanchez in the panel game. Yesterday afternoon she invited Almino Ruiz into her place, and with the assistance of confederates robbed him of \$303.60. Ruiz recently came him of \$303.60. Ruiz recently came here from the northern part of the State, and contemplated going on to Mexico in a few days, The loss of his money will keep him here now much longer than he desifes to remain. A feature of this case, which differs from those of the Sanchez robberies, is that when Ruiz accused the woman of the theft of his money and demanded its heft of his money and demanded its return she blew a police whistle, which quickly brought an officer to the scene. Ruiz being excited, could not explain himself sufficiently in English, and as Minnie told the officer that the fellow was creating a disturbance and she wanted him put out, the policeman did so. When the mistake was explained, and the two returned to the house some little time afterward the girl threw open the door and told them to search the house if they wished. search warrant was sworn out and Officer Smith made a thorough investi-gation of the premises, but could neither find the money nor any con-federates of the woman. Later a warthe woman arrested. She gave \$1000 bail with three sureties,

An Italian "Count."

Yesterday morning, a tall, fine looking and fashionably dressed man, perhaps about thirty years of age, entered the office of the Secretary of the Y. M. C. A. and asked to be furnished with board and lodging, saying that he had no money and could get no work. His appearance and manners indicated him to be a gentleman and a polished man of the world. He represented himself as belonging to an old and honored noble Italian family, and himself a Count. According to his own story, an act unworthy of a peasant brought him to his present condition. He was referred to a fellow-Italian, who provided for the Count's present necessities.
